unipak

Welcome to Unipak™

At Unipak™, we believe in keeping people safe for life's best moments. Proudly New Zealand-owned and Kiwi at heart, we've been delivering high-quality, fit-for-purpose products since 2004. Our mission is simple: to provide trusted solutions that make a difference, backed by world-class service and reliability.

With two decades of experience and global supplier connections, Unipak™ delivers innovative, trustworthy solutions. We carefully select suppliers, ensuring our products are safe, reliable, and where possible, ethically responsible. Our North Island warehouse and offices nationwide guarantee seamless customer support and fast dispatch.

Our trusted Bastion, Green Choice™, and Emperor™ branded products are used across key New Zealand industries, available directly through us or via our extensive partner network. More than just a supplier, we are your growth partner. Whether you need high-quality protection, dependable packaging, or industry expertise, Unipak™ is your partner in success.

At Unipak™, we are committed to delivering on our brand promise. Our core values—enjoy every day, be open for change, and deliver on our brand promise—guide everything we do. We believe in providing solutions that are not only effective but also responsible, and where possible, sustainable.

Our dedication to quality and service is unwavering. We ensure that our products meet the highest standards of performance and sustainability. Whether it's personal protection, sustainable food packaging, or kitchen essentials, we guarantee that our products are fit-for-purpose and exceed customer expectations.

We invite you to explore our catalogue and discover how Unipak™ can support your business needs. Thank you for your continued trust and partnership. Better together.

Julian Anderson
DIRECTOR: CEO

Hank Anderson
DIRECTOR: GENERAL MANAGER

At Unipak™, we are proud to hold HACCP certification, a globally recognized standard for managing risks at critical points. This certification ensures that our products are safe and reliable, minimizing risks and maintaining safety throughout the supply chain. By adhering to HACCP principles, we provide our customers with the confidence that our products are sourced and distributed under rigorous safety standards.

Why Unipak™?

Trust - built over two decades of partnership.

With over 20 years of experience, Unipak™ has earned a reputation for trustworthiness and reliability in the New Zealand market. Our long-term partnerships with thousands of businesses reflect our commitment to mutual growth. By leveraging our global supplier network, we deliver fit-for-purpose products, tailor-made to your needs, year after year.

Our team is always by your side—offering expert remote and on-site training, product demonstrations, and a dedicated support system to guide you in selecting the right solutions. As your growth partner, we reward continued collaboration through our loyalty programme, offering increasing discounts and exclusive benefits to help your business thrive.

Ease - seamless service, every step of the way.

At Unipak™, we make it easy for you. Outstanding customer service is our priority, built on engagement and responsiveness. Whether you're navigating our vast product range or require swift assistance, we are here to make your experience smooth and stress-free.

With nationwide coverage from our headquarters in Whanganui to our showroom in Auckland and offices in Hamilton and Christchurch, we provide fast dispatch and personalised support tailored to your needs. From product samples to post-sales support, we're here to ensure your success every step of the way. We also provide robust reporting and analysis, so you can make informed decisions for your business.

Reliability - a solid foundation for your success.

Reliability is at the core of Unipak™. We partner with over 30 manufacturers, each holding rigorous international certifications, to deliver products that exceed industry standards. Our extensive stock of 600+ product lines guarantees a steady supply of high-quality personal protection and food packaging solutions.

We understand the importance of on-time delivery. That's why we pride ourselves on our same-day dispatch promise and our industry-leading DIFOT success rate, ensuring your business gets the products it needs—when it needs them.

Personal protection and food packaging built for NZ business

From reliable stock and same day dispatch to helpful human support, we make procurement effortless.

Two decades: NZ - owned. NZ - operated. NZ wide.

From launching compostable ranges to delivering reliable support during critical times, our journey is rooted in innovation and partnerships that help businesses grow and thrive.

2004

Uni-Pak founded by Julian Anderson, a national wholesaler business selling food packaging and medical gloves.

25
RESELLER
NETWORK

2005

Reseller network grows to 25, distributing our products from Cape Reinga to Bluff and everywhere in between.

2006

Disposable glove demand doubles thanks to onboarding a major NZ agriculture company.

bastion

2012

Product brand Bastion New Zealand is born in collaboration with Bastion Australia.

Personal Protection

A level of defence
every New Zealander
should have

How to select the right disposable gloves

Selecting the ideal disposable gloves for every task

In every industry, the safety and well-being of workers are paramount. Disposable gloves form a first line of defense, protecting against contamination, facilitating hygiene in food service, and shielding hands in potentially hazardous conditions. With a variety of materials available, each type of glove is designed to meet specific needs - from medical-grade barriers to durable options for general use. Choosing the right disposable glove is not just about size and comfort; it's about matching the glove's material and quality to the task at hand. This guide will help you understand the properties of different glove materials and the importance of the Accepted Quality Level (AQL) in ensuring the highest standard of protection and performance.

Understanding the Accepted Quality Level (AQL)

The AQL is a crucial factor in glove selection. It signifies the quality level that is accepted by industry standards and provides a clear indication of a glove's barrier performance. A lower AQL number, such as 1.5, indicates a higher level of quality control, meaning fewer defects are allowed per batch. This standard is especially important in high-risk environments where exposure to harmful substances or the need for stringent sterility is high.

When selecting gloves for any application, it is essential to consider the AQL to ensure your choice aligns with the required safety standards and provides your team with the necessary level of protection. Bastion disposable gloves, with a certified 1.5 AQL rating, offer superior barrier protection and are trusted by industry professionals for their consistent quality and performance.

1 LATEX GLOVES

- Made from natural rubber from the Hevea Brasiliensis tree
- Biodegradable
- Excellent elasticity, dexterity and flexibility

APPLICATIONS

Beauty therapists, healthcare, dentists, laboratories, hairdressing, animal handling, childcare, aged care and food service

2 NITRILE GLOVES

- Made from a mixture of Acrylonitrile and Butadiene
- Latex free - lower risk of allergic reaction
- Excellent puncture resistance

APPLICATIONS

Healthcare, aged care, beauty, hospitality, food service, childcare, hairdressing, heavy industrial environments, animal handling and food processing

3 VINYL GLOVES

- Made from Polyvinyl Chloride
- Latex free - lower risk of allergic reaction
- Used in lower risk environments

APPLICATIONS

Food service, hospitality and cleaning

4 POLYETHYLENE (PE) GLOVES

- Made from Polyethylene
- Latex free - lower risk of allergic reaction
- Light weight for light duties

APPLICATIONS

Food service and deli counters

Chemical resistant

LATEX GLOVES

Disposable latex gloves are made from natural rubber, offering excellent elasticity and comfort. They provide reliable protection for medical and industrial applications, ensuring safety and hygiene.

Bastion Latex Powder Free Gloves

Bastion Latex Powder Free Gloves offer premium thickness and a balance between protection and comfort. These gloves are naturally biodegradable, silicone-free, and provide excellent strength and tactility. They feature a micro-textured finish for outstanding wet and dry grip.

Features and benefits

- Naturally biodegradable latex
- Silicone-free
- Durable, flexible material with good elasticity
- Excellent strength and tactility
- Comfortable fit
- Micro-textured finish for outstanding wet & dry grip
- Standard 240mm length
- Ambidextrous

NITRILE GLOVES

Disposable Nitrile gloves offer excellent snag, puncture, cut and abrasion resistance making them a great choice when protection is paramount. Nitrile is close to latex in fit, feel, dexterity and durability, however is more resistant to oils, fats, solvents and chemicals.

Bastion Nitrile Soft Powder Free Blue Gloves

Bastion Nitrile Soft Powder Free Blue Gloves are for applications where infection control is paramount and when more dexterity is preferred.

Features and benefits

- Excellent puncture resistance, surface strength and longer shelf life over latex and vinyl gloves
- Softer and thinner formulation for improved feel and sensitivity
- Dermatologically tested to prevent allergic reactions that can be encountered with latex
- Micro-textured fingertips for excellent wet and dry grip
- Standard 240mm length
- Ambidextrous

Bastion Nitrile Premium Powder Free Black Gloves

Bastion Premium Black Nitrile Gloves (Powder Free) are ideal for medical and industrial applications, offering a comfortable fit and high puncture resistance. These gloves are loved in the food service industry for their durability and reliable protection. The darker colour hides inks, stains, blood, and other colourants for a crisp and professional look.

Features and benefits

- Excellent puncture resistance, surface strength and longer shelf life over latex and vinyl gloves
- Nitrile gloves provide superior contamination resistance compared to latex and vinyl gloves
- Designed with a fully textured finish to give the user greater sensitivity and enhanced grip
- Black gloves do not show stains from inks and dyes
- Standard 240mm length
- Ambidextrous

VINYL AND POLYETHYLENE GLOVES

Vinyl and polyethylene gloves are a cost-effective solution for low-risk tasks where hygiene and convenience matter. Lightweight, ambidextrous, and easy to wear, they're ideal for food handling, cleaning, and general use.

Bastion Vinyl Ultra Powder Free Blue Gloves

Bastion Vinyl Ultra Powder Free Blue Gloves are a low-cost disposable glove option for lower risk work environments, such as food service and hairdressing.

Features and benefits

- Longer shelf life compared to latex
- Ideal for high-use applications where blood and fluid contamination risk is low
- Blue vinyl gloves provide easy identification in food production
- Standard 240mm length
- Ambidextrous

Engineered for hygiene. Designed to reduce waste.

The Bastion™ Progenics cuff-first glove dispensing system minimises cross-contamination by ensuring gloves are dispensed one at a time, cuff-first, from the bottom of the box. Users only touch the glove they take, and used gloves can't be reinserted. A fast, intuitive system built for high-use, hygiene-critical environments where safety and efficiency come first. The larger volume per pack and single glove disposal also help with sustainability and waste reduction.

**CUFF FIRST
REMOVAL**
FOR EASE OF USE

Bastion Progenics Nitrile Powder Free Blue Gloves

Gloves are dispensed cuff first from the box to help reduce the risk of contamination and wastage.

Understanding Performance Levels

Bastion gloves are certified to EN 388:2016 European safety standard third-party test that evaluates gloves for abrasion, cut, tear, and puncture resistance.

Each glove has a pictogram that indicates it has passed the EN388:2016 standard. The numbers indicate how well they performed against each test.

EN 388

XXXXX

ABRASION RESISTANCE

The glove is rubbed with sandpaper until it wears through. The more cycles it takes to make a hole, the tougher the glove.

CYCLES	LEVEL
≥8000	4
≥2000	3
≥500	2
≥100	1
<100	

BLADE CUT RESISTANCE (COUPE TEST)

A spinning blade moves across the glove at a steady pace. The test compares how long it takes to cut through the glove versus a standard material. The longer it lasts, the higher the score.

CUT INDEX	LEVEL
≥20	5
≥10	4
≥5	3
≥2.5	2
≥1.2	1
<1.2	

TEAR RESISTANCE

The glove material is first slightly cut, then pulled apart. The more force it takes to rip, the higher the protection level. (Top score = Level 4, which means it takes 75 Newtons to tear).

NEWTON	LEVELS
≥75	4
≥50	3
≥25	2
≥10	1
<10	

PUNCTURE RESISTANCE

A standardised nail is pushed through the glove. The more force it takes to pierce the material, the higher the rating.

NEWTON	LEVEL
≥150	4
≥100	3
≥60	2
≥20	1
<20	

CUT RESISTANCE (TDM TEST - ISO 13997)

For advanced materials that can dull a blade, this test uses a straight blade under increasing force. The higher the Newton rating, the more force the glove can handle before it's cut.

NEWTON	LEVEL
≥30	F
≥22	E
≥15	D
≥10	C
≥5	B
≥2	A

Glove Colour Sizing Chart

Many of our safety gloves have a coloured band at the cuff to quickly identify the size.

	Small
	Medium
	Large

	X-Large
	XX-Large
	XXX-Large

HOUSEHOLD GLOVES

Silverlined (Latex) reusable gloves are designed for commercial cleaning and for general purpose business and household usage.

The Latex outer offers durability, resists alkalis, alcohols, detergents, and chemical solutions. The inner silver lining provides heat resistance, while making them easy to put on.

Bastion Silverlined Yellow Gloves (Latex)

Bastion Latex Silverlined gloves come with an outer honey comb pattern for excellent grip, especially in wet applications.

Features and benefits

- Excellent strength, grip, abrasion, tear and puncture resistance
- Silverlined for easier donning
- Sanitised additive included to protect against bacterial and fungal growth
- Individually barcoded

Kraft Takeaway Boxes

Our range of cardboard snack boxes are very popular in NZ markets. They are pre-constructed and easy to close and seal. They are made of card and lined with PLA, a plant-based plastic, and not a petroleum-based plastic. This provides a barrier to oils and sauces and avoids leakage. Available in a selection of windowed and windowless options.

Standards and certifications

Kraft Noodle Boxes

Traditional noodle boxes are perfect for stir-fries, salads, noodles, and rice dishes. They are pre-constructed and easy to close and seal. They are made of card and lined with PLA, a plant-based plastic, and not a petroleum-based plastic. This provides a barrier to oils and sauces and avoids leakage.

Sandwich Boxes

Our sandwich boxes are flat-packed and very quick and easy to construct. They are made of card and lined with PLA, a plant-based plastic, and not a petroleum-based plastic. The clear window is also PLA.

PLA provides a barrier to oils and sauces and avoids leakage. As food contamination is not a problem, the waste container can be sent to a landfill (to eventually breakdown into plant matter) or sent to a commercial composting centre (for conversion into compost).

Large Containers

These durable and versatile large containers are made from microwave-safe polypropylene (PP), offering a convenient solution for food storage and transportation. The secure-fitting lids ensure freshness and prevent leaks, making them ideal for meal prep, takeaways, or storing leftovers. These containers are reusable, lightweight, and stackable, saving space in your kitchen or fridge.

Our Sustainability Journey: Progress with Purpose

At Unipak, we believe sustainability is a journey, not a destination. As a trusted supplier of high-quality personal protection and food packaging, we're committed to reducing our environmental footprint while supporting our customers with practical, responsible solutions.

To support this, we've partnered with a specialist third-party auditing consultancy to guide and validate our progress. Our investigations into Scope 1 and Scope 2 emissions are now underway, with a detailed reduction strategy being developed to ensure we're improving where it counts.

Key Areas of Focus

Smarter Materials: The Green Choice™ range is made from renewable, compostable, or recyclable materials like sugarcane, cardboard, PET, and PLA—designed to perform while reducing waste.

Responsible Disposal: We provide clear guidance on how to dispose of our products correctly, helping customers divert waste from landfill and contribute to a circular economy.

Lower-Impact Manufacturing: We are actively reviewing the environmental impact of our materials and working with suppliers to reduce emissions and resource use.

Innovation in Action: From innovative materials to sustainable solutions, we're constantly evolving our product lines to meet both performance and sustainability goals.

Certifications and Expertise

We are audited to HACCP standards and our products hold a range of certifications, which are available via our website. This demonstrates our commitment to transparency and reliability in our sustainability journey.

Dedicated Leadership

We have recently appointed a Projects Manager, as part of our Senior Leadership Team, focusing on enhancing our sustainability efforts. This role is crucial in driving our initiatives forward and ensuring we stay ahead in our commitment to environmental responsibility.

Future Goals

- We're committed to continuous improvement—guided by environmental responsibility, ethical sourcing, and transparent leadership. Our future focus includes:
- Expanding our range of certified sustainable products.
- Supporting customers with education and tools to reduce waste.
- Collaborating across industries to raise the bar for packaging sustainability.

See our website for the latest update on our journey.

Materials & Mindful Disposal
